

# Backup Recovery Testing

A feature available with N-able Backup

N-able™ Backup recovery testing offers regular automated test recoveries of your most critical servers. Save time and gain peace of mind with reports featuring screenshot verification that your system state, file, and folder backups are recoverable—and ready when you need them most.

## Automatically test backup recoverability

- Enroll your most critical Windows® servers in the recovery testing plan once, and testing will automatically occur every 30 or 14 days
- Save time: no need to download and install the recovery console
- Save resources: no need to find hardware or stand up a VM for testing

## Verify successful recovery

- A test VM is spun up in a cloud environment provided by N-able, the backup is restored, and a screen shot is captured to verify successful recovery
- The VM is deleted immediately upon test completion

## Understand recovery time frames

- Test recovery results appear in the device properties and can be shown in the main dashboard by customizing your view
- Review all recovery test results in the dedicated recovery testing dashboard
- Gain a sense of how long a specific server recovery may take

## Report and demonstrate value to customers

- Automatically send recovery test results with monthly reports to customers
- Preserve records of test recoveries for future reference
- Showcase the value of your data protection service and provide peace of mind

Please note that Recovery Testing is available only in the standalone and N-central®-integrated versions of N-able Backup, for customers with backup data stored in the United States, Canada, Germany, the UK or Australia.

N-able empowers managed services providers (MSPs) to help small and medium enterprises navigate the digital evolution. With a flexible technology platform and powerful integrations, we make it easy for MSPs to monitor, manage, and protect their end customer systems, data, and networks. Our growing portfolio of security, automation, and backup and recovery solutions is built for IT services management professionals. N-able simplifies complex ecosystems and enables customers to solve their most pressing challenges. We provide extensive, proactive support—through enriching partner programs, hands-on training, and growth resources—to help MSPs deliver exceptional value and achieve success at scale.
