

Advanced Email Security for Microsoft 365

A feature available with N-able Mail Assure

The N-able™ Mail Assure cloud-based email security solution helps you protect Microsoft 365™ users from cyberthreats that infiltrate through email. Mail Assure seamlessly integrates with Microsoft 365 via a Microsoft 365 add-in—and the single sign-on (SSO)/ sync functionality is designed for effortless onboarding of multiple Microsoft 365 users.

Increase email protection for Microsoft 365 users

- Safeguard Microsoft 365 inboxes with proprietary email filtering technology—with near 100% accuracy.
- Help prevent email and display name spoofing with support for SPF, DKIM, and DMARC.
- Reveal users and accounts sending out spam from networks with automated malicious activity management.
- Help prevent zero-day attacks with attachment and macro blocking management.

Simplify onboarding Microsoft 365 customers from a multitenant dashboard

- Add multiple Microsoft 365 users with an onboarding wizard, available from the Mail Assure interface, by safely connecting with Microsoft 365 credentials.
- Improve efficiency with automatic synchronization of new Microsoft 365 mailboxes, distribution lists, and shared mailboxes.
- Keep usage under control with scheduled automatic synchronization of added and deleted mailboxes.
- Manage customers through a multitenant dashboard with predefined settings, reporting, and views built for MSPs, customers, technicians, and email users.

Offer greater control and transparency over email flow

- Give users added control to report “spam” and “not spam” messages from Outlook®, on the web, macOS®, Windows® PC, iOS®, iPadOS®, or Android®, with the Microsoft 365 add-in available from Microsoft AppSource®—at no additional cost.
- Leverage SSO for Microsoft 365 and Azure® Active Directory® to the Mail Assure dashboard.
- Provide power over email flow with email user access to the spam quarantine, including options to release, remove, allow list, or deny list messages.
- Offer insights over email flow with email scout (quarantine) reports.

Maintain business productivity

- Keep email up and running with 24/7 built-in email continuity that allows users to continue to receive, compose, and send email in the case of Microsoft 365 outages or downtime.
- Help prevent customers from losing messages or access to important email with long-term email archiving.
- Retain and recover Microsoft 365 emails with unlimited retention-period capabilities for email archiving.
- Help users easily pull emails from existing Microsoft environments with support for journaling.

Keep Microsoft 365 customers safe and boost your bottom line

- Make it easier for Microsoft 365 customers to add additional layers of protection.
- Stand out from competition by offering powerful email security that provides seamless integration with Microsoft 365.
